If you drag the sub-tool between the tool icons on the toolbar, you will see a red line and the sub-tool will be created as a new tool. If you drag it onto an existing tool icon, you will see a red square around the tool icon and the sub-tool will be moved into that tool as an additional sub-tool of that existing tool. The icon on the toolbar will be that of the current sub-tool.

Rename the sub-tool tab (optional)

If you right-click on the sub-tools tab and click on the pop-up Sub tool group settings, and you
will be able to rename the tab. This does not change the tooltin for the tool

You can create another tab of sub-tools by dragging an existing sub-tool up into the blank tab area. Ared line will indicate where the tab will be created.
